

## **Questions and Answers on CI Exam Effective June 1, 2022 – March 1, 2022**

***Mark Surtees, MCI, asks if a mentee's three tone commercially available fly line is acceptable.***

The CI Exam does not allow candidates to mark their fly lines in order to prevent them from gaining unfair advantage on tasks such as accuracy. There is currently no rule disallowing multicoloured lines such as this one, but the Exam and EDP Committees continue to monitor the Exam and its administration on an ongoing basis.

***John Clark, MCI and Brian McGlashan MCI THMCI ask what the following statement in Performance Task 9 (wide loop rolls casts) means:***

***"The fly line and leader are not required to unroll completely and be relatively straight for the wide loop roll cast."***

For this task any combination of the leader (i) either unrolling completely or not; and (ii) either being relatively straight or not, is acceptable.

***Jeff Ferguson, MCI asks whose responsibility it is to provide the roll cast tool referred to on page 3 of the Exam.***

The candidate, who should be fully prepared to roll cast on either grass or water, is required to bring the roll cast tool.
